

## ISSUE

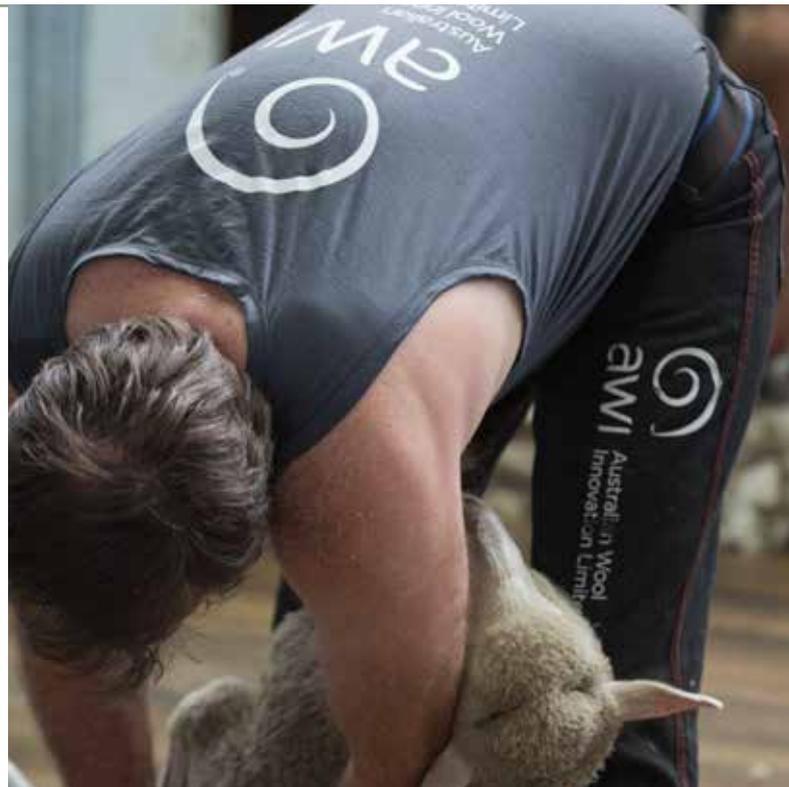

- To attract new entrants to the industry by providing practical learning opportunities for industry professionals to enhance their skills.

## PROMISED BY AWI

- To invest in In-Shed training for working shearers and wool handlers and support recruitment programs such as Shearing Industry Vocational Education Training in Schools.
- To build the capability of trainers including facilitating exchanges between States, support of the National Consistency Workshop, production and delivery of training resources and supply of uniforms to trainers.
- To support shearers and judges involved in regional, state and national competitions.

## DELIVERED BY AWI

- Shearer and wool handler training for 3,340 people, including 1,571 participating in In-Shed shearer training, 983 in In-Shed wool handler training and 786 in a range of events such as crutching workshops and vocational education in schools.
- According to the shearing contractor survey, 54 per cent of contractors thought that average daily shearing tally rates had increased and 75 per cent thought that the quality of shearing was much the same or had improved.

## BENEFIT TO WOOLGROWERS

- Increasing the productivity and profitability of Australian wool growing operations through improved shearer and wool handler skills.
- Health and safety benefits such as increased longevity in the workforce and reduced injury levels.
