OHS RESPONSIBILITIES

Competency	AHCOHS201A	Follow OHS Procedures
-------------------	------------	-----------------------

Trainee Name		Date:	
---------------------	--	--------------	--

A shearing shed is a dangerous place and with so much happening at once it only takes one small hazard to lead to a series of accidents. What about this...

A broom has been left lying on the board.
 A shearer trips over the broom and falls onto an unguarded grinder cutting his arm.

Who is responsible when things go wrong? Everyone has a Duty of Care to make the shearing shed a safe workplace. For each of the situations listed below write down who might be responsible.

SITUATION	WHAT COULD GO WRONG?	WHO MIGHT BE RESPONSIBLE?
Broom left lying on board		
Unguarded grinder		
Oil drum left open		

SITUATION	WHAT COULD GO WRONG?	WHO MIGHT BE RESPONSIBLE?
Worn hydraulic hoses on wool press		
Power cord from grinder running across floor		
Manager run over by rams when walking down ramp		
Exposed drive belts on plant		
Pen door left open when shearer takes second last sheep
